Welcome!

Welcome to Hann Manufacturing! This overview brochure contains just a sampling of the full line of handcrafted furniture we provide to schools and commercial users both nationally and worldwide. We invite you to learn how our furniture stands apart in construction and quality.

Building furniture that meets your need is Hann's mission. With a wide variety of furniture and casework for the art room to the workshop, we are likely to have what you are looking for. If not, we'll work with you to design and build the perfect piece.

We are a family owned and operated business that stands behind the products we sell and takes a personal approach to customer service. Include us in your next project and we know you'll appreciate the difference.

Construction: Quality Is In The Details...

With Hann Manufacturing furniture you will never have to say, “...they don’t build them the way they used to.” We use time tested methods and materials to construct furniture that will hold its own in the classroom year after year. Hallmarks of quality such as mortise and tenon joinery and dovetailing are present in every piece we build.

We use solid red oak or northern hard maple in basic structural furniture components such as framing, aprons, legs and spreaders. These North American hardwoods are known for their strength and durability. Hann uses full face frame construction. Face frames are mortise and tenoned, glued and pinned together to form a rigid structural component. Veneercore panels used for ends and interior components are routed into the face frame and each other resulting in sturdy, interlocking furniture and casework.

There are no assembly lines at Hann Manufacturing. Each piece is built one at a time by experienced hands allowing us to devote the necessary time and attention to the details that truly matter. Yes, we build it like they used to!

Hann Can! SM

Look for the Hann Can! idea boxes throughout this brochure for ways to adapt our standard products to meet your specifications. Whether it’s a minor adjustment or developing a unique piece for a special need, Hann Can! deliver your custom product without the custom price!

Fibersin top provides a dense, rigid, flat and smooth worksurface perfect for drawing and drafting.

WD-61

Solid hardwood is used for all exterior aprons. This ensures a lasting connection between an adjustable top and the front apron.

Strong and maintainable bolt-reinforced mortise and tenon joints connect 1-1/4" thick spreaders to each other and to the 1-3/4" square legs.

Drawer sides are dovetailed into the solid drawer front.

Hann crafts a wide variety of standard and custom drafting and drawing tables in one, two and four student configurations. From fixed and adjustable single tops to split tops with fixed reference areas Hann can design a single piece or complete room set to accommodate almost any need.

Workstations can be outfitted with a variety of fixtures.

SD-308

Heavy-duty full face frame construction ensures structural rigidity of stand-alone units.

If it's in the science room, Hann can build it! We have a complete selection of furniture and casework including student tables and workstations, teacher's desks, demonstration stations, mobile and fixed storage for microscopes and supplies in addition to safety items such as goggle disinfection storage and emergency showers.

Hann can provide everything you need to furnish your science lab! Our casework is built with full face frame mortise and tenon construction for years of rugged service. Choose from traditional red oak or northern hard maple and let us provide a layout drawing that meets your need.

Stools

1-1/4" thick top features rounded edges.

Top of the legs are mortise and tenoned into the seat and fastened with screws.

Two sets of stretchers are drilled, glued and pinned into the legs.

Legs and stretchers are round. Bottom of the legs are rounded.

Hann solid hardwood stools are unsurpassed for quality, durability and long life. Each stool is hand assembled and finished by skilled craftsmen. Hann stools are available in either red oak or northern hard maple and four heights: 18", 24", 27" and 30".

Tops

Fiberesin®

Multiple melamine layers over a dense 62 lb. particleboard core with a balancing backer. Provides a 3/4" thick, rock hard, smooth surface.

Common Uses: Drawing/Drafting

Maple

Pieces of solid maple glued together to form an attractive, durable and renewable worksurface. Common thicknesses of 1-3/4" and 2-1/4".

Common Uses: Art Tables, Workbenches

Plastic Laminate

Horizontal grade high pressure laminate with complimentary edging and phenolic backer over an industrial grade particleboard core. Nominal thickness is 1-1/4". Available in a variety of colors and patterns.

Common Uses: Art Tables, Mobile Demonstration, Life Sciences

Chemsurf®

Chemically resistant Wilsonart® plastic laminate over a particle board core with complimentary edging. Black is the standard color. Nominal thickness is 1-1/4".

Common Uses: Light Duty Science

Trespa®

Chemically resistant lab top based on a cellulose fiber reinforced phenolic resin core. Moisture and scratch resistant. Available in 1" and 3/4" thicknesses. Black finish is standard with other limited colors available.

Common Uses: All Sciences

Epoxy Resin

Monolithic modified epoxy resin is an inert, flat, non-porous surface that is highly resistant to virtually all chemicals found in school labs. Non-glare black finish is standard with other limited colors available. Available in 1" and 3/4" thicknesses.

Common Uses: All Sciences
